

# ACME

**Serie/Series ASP**

**Pompe peristaltiche a pressione  
Pressure hose pumps**

**Portata fino a 22.000 L/H – Capacity up to 22.000 L/H  
Prevalenza fino a 10 bar – Discharge pressure up to 10 bar**

**Resistente ad acidi ed abrasivi – Autoadescante  
Abrasive and corrosive resistant – Self priming**

SERIE / SERIES

**ASP | FX**

COME SI USA IL DIAGRAMMA

1. La velocità della pompa determina la portata richiesta.
2. Prevalenza calcolata.
3. Potenza effettiva richiesta.
4. Temperatura del fluido.
5. Prevalenza calcolata.
6. Massima velocità consigliata.

Tutti i valori descritti sono riferibili ad acqua e prodotto con eguali caratteristiche.

HOW TO USE THE CURVES

1. Flow required indicates pump speed.
2. Calculated discharge pressure.
3. Net motor power required.
4. Fluid temperature.
5. Calculated discharge pressure.
6. Maximum recommended pump speed.

The operating data here described refer to water or similar peculiarity fluid.

### Applicazioni

Impianti di trattamento acque, acque di scarico, industria chimica e petrolchimica, cartiere, industria tessile, industria ceramica, edilizia, industria mineraria, vernici e inchiostri, olii emulsionabili, industria alimentare e casearia, pastifici, settore enologico e di imbottigliamento, industria farmaceutica e cosmetica, concerie.

### Typical applications

Water purification plants, chemical and petrochemical industries, paper mills, textil industries, ceramics, building, mining industries inks and paints, emulsible oils, food industries and dairies, alimentary paste industries, wine and bottling plants, pharmaceutical and cosmetic industries, tanneries.

### Particolarmente adatta per:

- prodotti abrasivi
- prodotti acidi
- prodotti sensibili
- prodotti viscosi
- prodotti densi
- dosaggi
- vuoto
- impiego in ambienti esplosivi

### Highly suitable for:

- abrasive products
- corrosive products
- shear sensitive products
- viscous products
- high density products
- metering purposes
- vacuum situations
- use in explosive environments

### Materiali

1	Corpo pompa Asp 10-15	lega di alluminio ghisa
2	Rotore	lega di alluminio
3	Rulli Asp 10-15	lega di alluminio nylatron
4	Basamento	ferro
5	Attacchi standard	AISI 304
	Attacchi speciali DIN, TRI-CLAMPS, ANSI, ecc.	AISI 316 PVC PTFE Polipropilene

### Materials

1	Pump casing Asp 10-15	aluminium alloy cast iron
2	Rotor	aluminium alloy
3	Rollers Asp 10-15	aluminium alloy nylatron
4	Base	iron
5	Standard couplings	304 stainless steel
	Special couplings DIN, TRI-CLAMPS, ANSI, ecc.	316 stainless steel PVC PTFE Polypropylene

### Tubi

I tubi delle pompe ASP hanno struttura multistrato e sono disponibili in un'ampia gamma di mescole, scelte in funzione del fluido pompato.

### Hoses

Multilayer hoses with textile insert reinforcement, available in several compounds, to chose according to the piped fluid and work conditions.
